20243.10 Linear Approximations And Differentials7 8 =

$31.8 = 3.875$  We could instead have used the linear approximation centered at  $x = 9$ , also a nice value for the square-root function. In this case we obtain  $L_9(x) = f(9) + f'(9)(x - 9) = 3 + \frac{1}{6}(x - 9) = \frac{1}{6}x + \frac{5}{2}$ .  $L_9(15) = 4$  since 15 is much closer to 16 than to 9, we expect  $f(15) \approx 4$ .

An Introduction To Complex Differentials And Complex ...  
1. Introduction This technical report gives a brief introduction to some elements of complex function theory. First, general definitions for complex differentiability and holomorphic functions are presented. Since non-analytic functions are not complex differentiable, we focus on analytic functions. Complex differentials and Frechet derivatives can be found in M. Spivak, Calculus on Manifolds, J. Munkres, Analysis on Manifolds, or Rudin, Principles of Mathematical Analysis. If you're interested, E. W. Cheney's Analysis for Applied Mathematics gives a treatment of Gateaux and Frechet derivatives at a level one notch above the previous books.  
Apr 11th, 2024  
Mortality Differentials By Religion In The U.S. Religion may be correlated with marital status, another commonly used way to measure social support (House et al. 1988). Marriage is strongly associated with better health and longer life (Waite and Lehrer 2003). Being married generally means having a partner to provide marital support.
