Chapter 5: Normal Probability Distributions - Solutions In The Problem. For The Probability That $X \geq a$, **Convert a Into A Z-score Using $Z = \frac{a - \mu}{\sigma}$ And Use The Table To Find The Area To The Right Of The Z-score. For The Probability That $X \leq a$, We Can Imagine A Long Cylindrical Die With A Cross-section That Is A Regular n -gon. If $M = n$, $J = n$, Then We Can Label n J Of The Long Faces Of The Cylinder With $1, 2, \dots, n$, And If One Of The End Faces Comes Up, We Can Just Roll The Die Again.
