Its density may vary from point to point. Also its velocity vector may vary from point to point. Figure 18.0.1 shows four typical situations. The diagrams show flows in the plane because it's easier to sketch and show the vectors there than in space. May 1th, 2024. Turn off all indep. sources except one source. Find the output ( $v$  or  $i$ ) due to that active source using techniques in chapters 2 & 3. 2. Repeat step 1 for each of the other indep. sources. 3.
