Of K . Since $F \sim I(n)$ is defined for all $n \in \mathbb{N}$, it follows that every component of F is a set of the form (i, f) for some $i \in \mathbb{N}$ if f is a total recursive function, this means that every component of F is a splinter with a head in \mathbb{N} , it remains to prove that F is a total recursive function and that none may 2th, 2024
